Projects

Defined (Rails) | [live demo](#) | [github](#)

Defined is an app that makes and saves a user's word definition queries for easy and quick reference. Uses the Merriam-Webster API.

Shape Tango (Front End) | [live demo](#) | [github](#)

A simple project to explore animation using HTML, CSS and JavaScript. Modeled after a project done with the KineticJS library but done without for learning purposes.

Skills

Ruby, JavaScript, Ruby on Rails, JQuery, HTML5, CSS3, Git workflow, pair programming, Testing (RSpec) AJAX, APIs.

Experience

Recent Graduate, Dev Bootcamp; San Francisco, CA — 2014

DevBootCamp is an intensive program for web development, with an emphasis on Ruby on Rails.

At Dev Bootcamp I learned the following:

- Ruby, Sinatra, Rails
- Javascript, JQuery, AJAX
- HTML5, CSS3
- ActiveRecord, SQLite, SQL, PostgreSQL
- Test-driven development (TDD) with RSpec and Jasmine, Capybara, FactoryGirl
- Git, Github
- Agile development process
- Engineering Empathy

Production Assistant, 2K Marin; Novato, CA — 2013

2K Marin is a video game development studio.

At 2K Marin I performed the following:

- Helped to create and manage schedules, tracking documents and daily reports.
- Implemented English and Localized subtitles content and timing for all cinematics.
- Worked with Quality Assurance to regress bugs on Xbox 360, Playstation 3 and PC.
- Created and edited content on our company's Wikis.
- Administered weekly, studio wide presentations.
- Scheduled and booked meetings, recorded notes and distributed them to team members.

Education

University of Puget Sound — B.A. Communication Studies, 2009

Lambda Pi Eta Honors Society
